MSc Education

The MSc Education curriculum enables you to look at the big picture. You will examine some of the key challenges faced by learners, education providers, and policy-makers in their social context from a rigorous social science perspective. Working closely with classmates and academic staff, you will have the opportunity to explore these challenges and to benefit from interdisciplinary perspectives, including education, sociology and psychology in the formulation of effective solutions.

You will study current trends in education policies, practices and discourses, including the most recent themes and developments in curriculum studies and education strategies from the field of psychology. This programme will equip you with the analytical and practical skills to understand the principles of education and educational research, and challenge you to develop innovative interventions that will empower learners.

Key features

- Study education in ways that go beyond a focus on classroom practice to address the wider debates around education.
- Our close links with policy makers, schools, colleges and other education organisations provide opportunities for active engagement with education practitioners, leaders and decision-makers.
- Develop a deep understanding of core theories and concepts related to education policy, organisation and practice.
- Gain insights from different disciplines including education, sociology, political science and economics research to address complex educational problems.

Career prospects

This programme will lay the foundation for a wide variety of careers. Graduates of this programme will be suited to working in education-related roles within formal or non-formal education organisations, government departments and regulators, foundations and think-tanks, charities, the media or as social entrepreneurs in the area of education.

This programme also provides strong foundations for doctoral work, either through a traditional PhD or a professional doctorate.

Please note that this programme is not a teaching qualification and does not provide Qualified Teacher Status.

Typical entry requirements

This programme is suitable for those who have an interest in education practice, organisation, policy or research. This includes those who have little or no professional experience of education-related work to mid-career professionals engaged in teaching, educational leadership and organisation or other education-related activities.

Applicants should normally hold a first or second-class honours degree in a relevant subject area or have appropriate professional experience. This course is suitable for graduates with a background in social sciences or humanities.

"This programme gives students exposure to a broad range of perspectives to develop unique insights into education. You will study the latest developments from a variety of disciplines in ways that will transform how you understand educational challenges and solutions."
